

Wisdom Worth Having - AI Studies Curriculum

Planning and Organisation (Ages 13+)

Program Overview

This course teaches students how to use AI as a powerful assistant for planning, organizing, and executing goals effectively. Good planning turns vision into reality. Students will learn to create clear plans for personal life, school projects, businesses, content creation, and long-term goals while maintaining personal responsibility and discipline.

The course combines practical tools with biblical wisdom on diligence, stewardship of time, and purposeful living.

Core Goals:

- Master using AI for structured planning and organization.
- Develop strong organizational habits and systems.
- Learn to break big goals into actionable steps.
- Create reliable workflows and project plans.
- Integrate AI tools while keeping human oversight and accountability.
- Apply biblical principles of diligence, wisdom, and stewardship to planning.

Course Length: One semester or full year module

Format: Hands-on planning exercises, real projects, templates building, and system creation.

Curriculum Outline

Quarter 1: Foundations of Planning

- The Biblical Importance of Planning and Diligence
- Goal Setting with Purpose and Vision
- Using AI for Brain Dumping and Organizing Thoughts
- Creating Simple To-Do Lists and Daily Plans
- Understanding Priorities and Time Management
- Basic Project Breakdown Techniques

Project: Build a complete personal weekly and monthly plan using AI support.

Quarter 2: Project and System Planning

- Breaking Down Large Projects into Steps
- Creating Timelines, Milestones, and Deadlines
- Using AI for Gantt Charts and Visual Planning
- Task Prioritization Methods (Eisenhower Matrix, etc.)
- Resource Planning and Allocation
- Building Reusable Planning Templates

Project: Plan a full school, business, or ministry project from start to finish.

Quarter 3: Advanced Organization and Workflows

- Building Personal Knowledge and Task Management Systems
- Creating Content Calendars and Marketing Plans
- Workflow Automation Concepts with AI
- Team Planning and Delegation

- Review, Adjustment, and Progress Tracking
- Integrating Multiple Tools and Systems

Project: Design and implement a complete organizational system for their life or a chosen venture.

Quarter 4: Strategic Planning and Mastery

- Long-Term Vision and Strategic Planning
- Scenario Planning and Contingency Plans
- Using AI for Decision Making and Trade-Off Analysis
- Scaling Plans and Systems for Growth
- Maintaining Discipline and Accountability
- Creating a Personal Life Operating System

Capstone Project: Students create a comprehensive Life/Business Plan that includes vision, goals, detailed execution steps, timelines, tracking systems, and a biblical foundation for their approach to planning and stewardship.

Key Skills Developed

- Structured thinking and breakdown of complex goals
- Effective AI prompting for planning
- Creating reusable systems and templates
- Time management and prioritization
- Progress tracking and adaptation
- Strategic long-term thinking

Biblical Integration

- The wisdom of planning (Proverbs 16:9, Proverbs 21:5)
- Diligence and stewardship of time
- Balancing planning with trust in God
- Purposeful living and avoiding procrastination
- Serving others through good organization

Assessment

- Weekly planning exercises and reflections
- Project planning assignments
- System creation and implementation
- Consistency in using personal planning tools
- Final Comprehensive Plan (Capstone) with reflection

This Planning and Organisation course at Wisdom Worth Having equips students to move from ideas to execution with clarity, discipline, and wisdom, using AI as a faithful servant rather than a master.

Would you like me to create the next curriculum (Writing/Content Creation or Video/Multimedia) or develop handouts and detailed lesson plans for this one? Let me know how you want to proceed.
